

The PF5875 HGV surface mounted flow plates are stylish, simple, and incredibly effective.

Designed to encourage mono-directional traffic flow control, the PF5850 prevents unauthorised access entering via the wrong direction. They are designed for use by heavy goods vehicles as there design lends to the needs of having to be a durable solution to one way traffic control for larger or heavier vehicles.

We highly recommend the use of speed ramp and warning signage in conjunction with flow plates.

**Product Description:**

PF5875 HGV Surface-Mounted Traffic-Flow controller

**Material:**

Heavy Steel

**Dimensions:**

510mm x 300mm x 105mm

**Finish:**

High Visibility Yellow and Black

**Installation:**

Surface-mounted ideal for concrete or hard wearing surfaces.

**DESIGN FEATURES**

A sophisticated in-built heavy duty sprung action ensures that the PF5875 returns to the upright position after a vehicle has passed over it. Constructed from heavy steel, the Flow control plate is designed to encourage a mono-directional flow of traffic, as well as preventing vehicles from entering, if they are travelling from the opposing direction.
