Flexible Payment Options

Parkman APS offers you a wide range of payment options. It has a user-friendly TFT LCD monitor and supports various bank notes, coins, voucher cards, traffic cards and credit cards that allow customers to quickly understand the payment procedure with variety of payment.

User-Friendly

The ergonomic design of the pay station guides your customers through the entire transaction process. Clearly defined instructions are simple to follow. Many user-friendly features are built into the pay station, including simple operation for customer, service personnel and management.

High Security

Access to the payment systems (coin, bank note, credit card, etc) requires an electronic password plus mechanical keys. Different keys are used for each cash module, and each module is monitored electronically for maximum security. Comprehensive cash audits and facility management reports can be captured on-line or off-line to ensure 100% collection of all parking fee.
